

## **WEATHER AND ATHLETIC EVENTS**

When weather conditions make it unsafe for teams to travel to an event the decision to postpone the event is done by me in most cases the afternoon before the day of the tournament in consultation with anyone else involved in the running of that event. This is done so schools can inform students before they leave for the day. Generally we will always err on the side of caution. If the weather improves after the postponement is decided upon and announced it will not be reinstated for the day it was to run on. Any event postponed will be completed. If we get a weather condition overnight that effects safety I along with those involved in the running of the event will be responsible for contacting both the principals of all schools as well as the coaches early that morning. All coaches should have a fan out system in place. Hopefully this situation will not arise but we must be prepared for it.
