

Mathematics

Second semester finds the math department very busy. All of the math contests have been written, and, as usual, our school placed near the top. Look for lots of awards and medallions to be given out at the Awards Assembly later this year.

In addition, E.L. Crossley is a pilot school implementing the use of brand new TI-Nspire calculators. These amazing machines do everything the other graphing calculators do, plus a number of algebra applications. Our teachers have already attended numerous workshops to become better aware of how to best use this new technology.
