How to use Basic H²

1. Fill a squeeze bottle with 50% Basic H² & 50% water
2. Apply solution to the hair as you would any shampoo

3. Add water & work into a good lather.
4. Wrap your head in a towel for about 15 minutes

5. Rinse with water
6. Apply your favorite cream rinse
7. Leaves hair clean and manageable

Follow these instructions as frequently as you like. Basic H² is pH balanced. It does not dry the scalp or hair, or strip the hair of its natural oils.

DISCLAIMER: These recommendations have been gathered from Health Care Professionals, & are the results of personal findings of people who have used the products. This literature is not published by Shaklee Corporation. The suggestions given are not guaranteed or in any way approved by the Shaklee Corporation. Officially, Shaklee Corporation markets Basic H² as a biodegradable general purpose cleaner.

Toxin-Free Option for

Head Lice

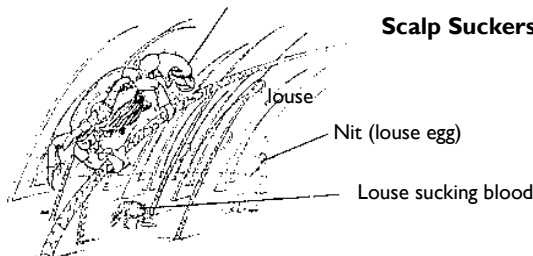

Want to **STOP**
using Chemicals
on your child?

Reach for Shaklee Basic-H²

No Stink
No Mess
No Hair Damage
No Chemicals
& Most Importantly - No Lice!

Facts About Head Lice

1. A head louse is a blood sucking wingless parasite with six legs.
2. Head lice is spread by head to head contact with an infested person, or may be passed around on shared combs, brushes, hats, and other personal items.
3. Anyone can get head lice. In fact, head lice love clean, healthy heads.
4. Head lice will be around as long as there are humans to act as hosts.
5. Head lice live approximately 40-50 days and go through 3 stages in their life cycle:
 - Eggs (nits): the female louse lay the eggs with a special glue that cements it to the hair shaft. The eggs develop and hatch approximately 10 days later.
 - Nymphs (larva): Once the louse hatches it needs a human blood meal within 45 minutes to survive. In about 12 days it is an adult.
 - Adults: the adult louse can lay up to 4-10 eggs per day, starting another generation of lice. The adult stage lasts about 28 days.
6. Head lice burrow their mouth parts into the scalp to feed once or more each day.
7. Head lice can live off of a human head for 24-36 hours.
8. If you have been exposed to head lice, check your head every few days for 3-4 weeks
9. The most common symptoms of head lice is itching, especially behind the ears or at the nape of the neck.
10. Head lice do not live on animals-they can only survive on humans

Traditional Head Lice Treatment

Pediculicides are shampoos containing chemical pesticides used to treat head lice. Some of the most common ones contain toxic chemical pesticides such as Pyrethrin, Permethrin, Melathion, & Lindane.

The Dangers of Many Treatments

Warnings & cautions accompany these pesticide-based shampoos. Some side effects in the literature are:

Pyrethrin:

- May trigger allergic reactions, including acute asthma attacks
- Skin rash
- Upper respiratory irritation

Permethrin:

- Eye, skin, nose & throat irritation
- Burning & itching skin
- Numbness
- Rash & stinging
- Swelling
- Headaches/Seizures

Melathion:

- Vision loss
- Headaches
- Coma
- Possible carcinogen

Lindane:

- Liver/Kidney damage
- Breast cancer
- Hormone disruption
- Pulmonary edema

Is it any wonder that people are looking for **SAFE, NON-TOXIC OPTIONS** as a treatment for Head Lice?

Why Choose Shaklee Basic H²

Basic H² is:

- Non-Toxic
- Natural
- Hypo-Allergenic
- No Side Effects

It gives the hair & scalp a clean, natural feeling without causing irritation to be skin.

**Odourless
Non-Sticky
Non-Greasy**

**Basic H²
Price \$14.35

What is Basic-H²

Shaklee Basic H² is an all organic, biodegradable wetting agent (surfactant), developed "In Harmony with Nature and Good Health", as are ALL Shaklee Products.

As a wetting agent, it penetrates the outer coating of the adult louse or nymph (larva) & actually suffocates it. It penetrates & softens the egg (nits) so they will not hatch.
